

PROMASEAL[®] Fire Pillows

PROMASEAL Fire Pillows are made from treated cloth filled with high density, granulated fire seal mineral wool. In case of a fire, pillows will remain in place and form a barrier by charring and creating a solid mass of insulating material. All electrical & service openings in fire rated walls & floors are to be properly fire stopped with 2& 3hrs fire rated PROMASEAL[®] FIRE PILLOWS packed tight into openings starting at one edge and working to the center of opening (in case of floors); and at bottom working up (in case of walls). Ensure any possible through gaps (e.g.; near cables) are sealed with PROMASEAL[®] mastic sealant. All the installation shall be done in accordance with the manufacturer's instructions to meet the performance criteria in accordance with the BS 476 Part 20.

They can be used in floor and wall situations and have been tested for up to 3hrs with various services penetrating them. Supply & Installation of System should done by authorized Dealer & Installer M/s.Ardor Fire & Safety Systems – Mumbai. **The system will be supported by a valid International Test report of the complete system as per BS 476 part 20 issued by M/s.Promat International Asia Pacific Ltd.**
