

## PROMASEAL® acrylic intumescent sealants:

PROMASEAL® sealants are acrylic intumescent or silicone based materials of putty consistency with excellent adhesive and fire resistance properties. PROMASEAL® sealants are designed to prevent the spread of fire and smoke through joints and gaps in fire rated walls and floors and around service penetrations. When exposed to the heat, PROMASEAL® Acrylic Sealant expands forming an insulating char thus preventing the passage of fire and smoke. The choice joint sealant shall be determined by the configuration and the requirement for the degree of movement in substrates. Supply & Installation of System will done by authorized Dealer & Installer M/s.Ardor Fire & Safety Systems – Mumbai. **The system will be supported by a valid International Test report of the complete system as per BS 476 part 20 issued by M/s.Promat International Asia Pacific Ltd..**
